4. Definitive Drug Testing Selection Medical Necessity and clinical rationale of each test ordered should be documented in the patient's medical record.

Please make your definitive testing choices below by clearly marking the "Definitive" check box with an "X" for each drug/drug class that you have determined medically necessary for the treatment of the patient. Please see the back of the requisition form for a full description of Stone Clinical Laboratories 13 Panel EIA screen, as well as additional drug(s)/drug classes on the testing menu.

Drug/Drug Class	Definitive	Rx	Drug/Drug Class	Definitive	Rx	Drug/Drug Class	Definitive	Rx	Additional Definitive Testing Orders:
Alcohol Biomarkers^{2,3}	<input type="checkbox"/>		Illicit Drugs⁴	<input type="checkbox"/>		Pregabalin¹	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/> Definitively test the prescribed medications that have been included with this specimen? <input type="checkbox"/> Definitively test the presumptive positive and unexpected negative results in Section 3 Presumptive Drug Screening Results <input type="checkbox"/> Definitively test the presumptive positive and unexpected negative results from the attached presumptive screening results performed in office ⁵ Additional tests can be ordered by writing in the test code(s) in the "Other Drugs" section. 5. Medical Necessity Criteria Patient Risk Stratification: Low Medium High Stage of SUD Treatment: _____

Here are some examples of possible documentation that may support the medical necessity of your testing orders. You may choose one or more of the following or use the space provided below to document your testing choices. Please note that the medical necessity of all presumptive and definitive testing orders need to be documented in the patient's medical record.

Testing Frequency Criteria:

Baseline- prior to the initiation of chronic opioid therapy. Risk Level- testing based on the patient's specific risk level. Targeted- testing ordered based upon specific aberrant, non-clinical behaviors that have been documented in the medical record.

Patient has known indicators of risk for Substance Use Disorders.

Definitive testing has been ordered for a drug(s)/drug classes that the patient has a history of use, misuse or abuse of.

Definitive testing has been ordered to provide specific drug level information for the following drug classes: Amphetamines, Barbiturates, Benzodiazepines, and/or Opiates.

Definitive testing has been ordered for a drug(s)/drug classes that presumptive findings are inconsistent with the patient's documented medical history or current medication list.

On the date of service the patient has displayed suspicious behaviors, self-escalation of dose, doctor-shopping, indications/symptoms of illegal drug use, evidence of diversion, or other change in affect or behavioral pattern.

Note to Ordering Provider: A Provider must order only those tests that are medically necessary for the patient, given his or her clinical condition. Provider must submit the diagnosis information for all tests ordered and medical necessity should be documented in the patient's medical record. Medicare, Medicaid and other third party payers will only pay for tests that meet the payer's coverage criteria and are reasonable and necessary to treat or diagnose the patient.

Provider Signature Attestation: I understand that if I order medically unnecessary tests that are billed to Medicare, Medicaid or other government payers, I may be subject to sanctions or remedies under civil, criminal or administrative law. I also attest that the documentation of the medical necessity of all tests ordered has been documented in the patient's medical record.

Note: Medicare generally does not cover routine screening tests.

Footnotes:

- ¹This is ordered and billed as a class.
- ²This is ordered and billed individually depending on the number of drugs that are chosen.
- ³When ordered as a class, this drug class contains additional drugs that are listed on the back of the requisition form. Please review those drugs for medical necessity and financial reasonableness for each patient for whom this is ordered.
- ⁴These drugs have been grouped together for clinical utility but will be billed as individual CPT codes per the AMA Definitive Drug Class Listing.
- ⁵This order will incur additional costs as related to the addition of CPT codes for each of the drug/drug classes that are provided. Please refer to the Stone Clinical Laboratories fee schedule for guidance, as well as the back of the requisition form.
- ⁶LC-MS/MS cut offs when represented as a range are representative of multiple drugs within a class.

³Panel Presumptive Screening for DOA Testing
This Panel Presumptive Screening for DOA will be available for clients who DO NOT perform presumptive screening in the office setting. The Laboratory Test Code has been provided, as well as the HCPCS Code (G6979) and AMA CPT Code (80397) for this testing. Please consult the Stone Clinical Laboratories Testing Manual for cut-offs of specific drugs within each class.
